Sub: **Acceptance of poor textured gunnies for CMR rice in PEG Depot.**

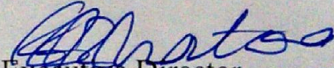

Ref: This office letter no.

1. PEG/Storage loss (Part File)/2014/1109 dated 18/11/2014
2. PEG/Storage loss (Part File)/2014/1108 dated 18/11/2014

The inspection reports of senior officers suggests that during crop year 2013-14 very poor textured gunnies were accepted while taking delivery of CMR Rice in PEG Godowns. Poor textured gunnies are bringing not only huge storage losses but also become the major cause of huge quantity of spillage/loose grain left over in each stack during loading of rakes. Such left stock remains as such for days together so inviting adverse remarks from FCI and other quarters. FCI is not making payment for collection of spillage and thereby the HLC labour also refused to carry out such job. The other drawback of poor textured gunnies is that it fetches complaints of abnormal Transit Losses from the destination.

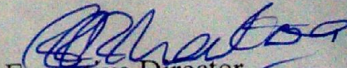

Now, Pungrain Hqrs has recently issued instruction vide above references and has authorize Pungrain staff/PMS agency/Investor (L&S) to go for joint sampling/analysis and authenticate MCR, MCI and weight jointly with FCI. In Weight Check Memo, there are two columns of 'Type of Gummies' and 'Condition of Gummies', therefore before authenticating Weight Check Memo during acceptance of rice, the Pungrain/PMS agency has full right to check and certify the texture of the gunnies, proper stencilling/tag, contract no, stitching etc, and in case they are not satisfied with the texture and the type of gunnies, the Pungrain/M/s Origo/Investor (L&S) have full authority to reject such consignments and give in writing to the FCI and the miller for re-offering such consignment.

Thus, in the interest of the corporation, you are requested to advise the field staff accordingly and implement these instructions strictly.
