Foodgrains, Allied Products and Other Agricultural Produce Sectional Committee, FAD 16

FOREWORD

This Indian Standard was adopted by the Bureau of Indian Standards, after the draft finalized by the Foodgrains, Allied products and Other Agricultural Produce Sectional Committee had been approved by the Food and Agriculture Division Council.

Vitamin and mineral premixes are dry or liquid custom blends of a wide range of vitamins, minerals, or combinations of vitamins and minerals, which are used in food and beverages for enrichment or fortification purposes with an objective of enhancing the nutritional value of the products. This standard lays down the specification for vitamin and mineral premixes used for manufacturing fortified rice kernels.

In the formulation of this standard, due consideration has been given to the provisions of the *Food Safety and Standards Act*, 2006 and the Rules framed thereunder and the *Legal Metrology (Packaged Commodities) Rules*, 2011. However, this standard is subject to the restrictions imposed under these, wherever applicable.

The composition of the Committee responsible for formulation of the standard is given in Annex A.

For the purpose of deciding whether a particular requirement of this standard is complied with the final value, observed or calculated, expressing the result of a test or analysis shall be rounded off in accordance with IS 2:1960 'Rules for rounding off numerical values (revised)'. The number of significant places retained in the rounded off value should be the same as that of the specified value in this standard.

Indian Standard

VITAMIN AND MINERAL PREMIX FOR MANUFACTURING FORTIFIED RICE KERNELS — SPECIFICATION

1 SCOPE

This standard prescribes the requirements and the methods of sampling and test for vitamin and mineral premix for manufacturing fortified rice kernels.

2 REFERENCES

The standards given below contain provisions which, through reference in this text, constitute provisions of this standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent editions of these standards.

IS No./Other Publication	Title
1070 : 1992	Reagent grade water — Specification (third revision)
2491: 2013	Food hygiene — General principles — Code of practice (third revision)
5282 : 1969	Liquid sedimentation methods for determination of particle size of powders
16072 : 2012	Determination of moisture content in milk powder and similar products (Routine method)
16639 : 2018/ ISO 20633 : 2015	Infant formula and adult nutritionals — Determination of vitamin E and vitamin A by normal phase high performance liquid chromatography
16640 : 2018/ ISO 20634 : 2015	Infant formula and adult nutritionals — Determination of vitamin B ₁₂ by reversed phase high performance liquid chromatography (RP-HPLC)
EN 14164 : 2014	Foodstuffs — Determination of vitamin B ₆ by high performance chromatography

3 TERMINOLOGY

For the purpose of this standard, the following definitions shall apply.

- **3.1 Fortified Rice Kernels (FRK)** Rice shaped kernels containing vitamins and minerals produced through extrusion or whole rice kernels coated with vitamins and minerals.
- **3.2 Fortified Rice** Blend of fortified rice kernels and polished raw or parboiled rice in the ratio of 1 : 100 or 2 : 100.
- **3.3 Vitamin and Mineral Premix (VMP)** Combination of micronutrients (vitamins and minerals) in desired proportion ready for use as fortificant in the manufacturing of fortified rice kernels.

4 REQUIREMENTS

4.1 Description

Vitamin and mineral premix shall be free flowing powder without any lumps, made from food grade forms of vitamins and minerals and shall contain vitamins and minerals in specified proportions.

- **4.2** Vitamin and mineral premix shall be white to off white in colour with faint odour. It shall be easy to use and free from any objectionable or undesirable colour, odour and foreign matter.
- **4.3** Vitamin and mineral premix shall be manufactured in premises built and maintained under hygienic conditions (*see* IS 2491).
- **4.4** Chemical composition of vitamin and mineral premix shall be as under:
 - a) Micronized ferric pyrophosphate or sodium iron (III) ethylene diaminetetraacetate trihydrate (sodium feredetate -NaFeEDTA);
 - b) Folic acid; and
 - c) Cyanocobalamine or hydroxycobalamine.
- **4.5** Vitamin and mineral premix may also contain following chemicals:
- a) Zinc oxide (ZnO);
- b) Retinyl palmitate;

- c) Thiamine hydrochloride, or thiamine mononitrate;
- d) Riboflavin, or riboflavin 5'-phosphate sodium;
- e) Nicotinamide, or nicotinic acid; and
- f) Pyridoxine hydrochloride.
- **4.6** Chemical forms of micronutrients shall be micronized and uniformly distributed within vitamin and mineral premix.
- **4.7** The composition of vitamin and mineral premix shall be according to the stated micronutrient composition when tested as per methods prescribed in Table 1.

4.8 Ingredients

Vitamin and mineral premix shall be prepared by using following ingredients:

- a) Base or carrier material used in vitamin and mineral premix shall be white in colour; and
- b) Permitted food grade emulsifiers/ hydrocolloids/ binding agents)/acid regulators/ antioxidants shall be used as per the allowances prescribed under regulations.

4.9 In addition to the above, Vitamin and Mineral Premix shall conform to the requirements specified in Table 2.

5 PACKING AND STORAGE

- **5.1** Vitamin and mineral premix shall be packed in food grade packaging material which is non-transparent, non-reactive, water-resistant and impermeable to light, water vapour, oxygen, carbon dioxide and other gases.
- **5.2** The product shall be packed in quantities as stipulated under the *Legal Metrology (Packaged Commodities) Rules*, 2011 as well as in accordance with requirements under the *Food Safety and Standards Act*, 2006 and the Rules framed thereunder.

5.3 Storage

Vitamin and mineral premix shall be stored in a clean, dry and cool place and the storage temperature shall not exceed 25 $^{\circ}$ C.

Table 1 Methods of Test for Vitamins and Minerals

(Clause 4.7 and 8)

SI No.	Chemical Form of Micronutrient	Method of Test
(1)	(2)	(3)
i)	Micronized ferric pyrophosphate	AOAC 944.02 or AACC 40-70.01 (total iron present in ferric
	Sodium iron (III) ethylenediamine tetraacetate trihydrate (sodium feredetate- NaFeEDTA)	form) by Atomic Absorption Spectroscopy or Spectrophotometry or AOAC 984.27 using ICP Emission
ii)	Folic acid	AOAC 992.05
iii)	Cyanocobalamine or hydroxycobalamine	IS 16640
i)	Zinc oxide (ZnO)	AOAC 984.27 (using ICP emission spectroscopy) or AACC 40-70.01 (using atomic absorption)
ii)	Retinyl palmitate	IS 16639
iv)	Thiamine hydrochloride or Thiamine mononitrate	AOAC 2015.002 or AACC 86-80.01 (Total thiamin, thiamin phosphate, thiamin diphosphate, and thiamin triphosphate)
v)	Riboflavin or riboflavin 5'-phosphate sodium	J.AOAC Int. 2009;680-687
vi)	Nicotinamide or nicotinic acid	AOAC 2015.003 or AACC 86-90.01
vii)	Pyridoxine hydrochloride	EN 14164

Table 2 Physical characteristics of Vitamin and Mineral Premix

(Clause 4.9, 6.2 and 8)

Sl No.	Parameters	Specification	Method of Test, Ref to
(1)	(2)	(3)	(4)
i)	Moisture content, percent by mass, Max	11	IS 16072
ii)	Particle size of micronized ferric pyrophosphate (D_{90} particles), μm	1-3	IS 5282

6 MARKING

- **6.1** The ink used for marking shall be of such quality which may not contaminate the product. Each package shall be suitably marked legibly and indelibly as to give the following information:
 - a) Name of the product;
 - b) Name and address of the manufacturer;
 - c) Date of packing;
 - d) Lot/batch number;
 - e) Net quantity;
 - f) Best before......month.....year;
 - g) List and levels of the micronutrients along with their chemical form;
 - h) Food grade compliance declaration;
 - j) Storage advisory note; and
 - k) Any other information required under the Legal Metrology (Packaged Commodities) Rules, 2011, the Food Safety and Standards (Labelling and Display) Regulations, 2020.
- **6.2** Vitamin and mineral premix manufacturer should provide the certificate of analysis (COA) and chemical composition along with food grade certificate including all the requirements specified in Table 2.

6.3 BIS Certification Marking

The product(s) conforming to the requirements of this standard may be certified as per the conformity assessment schemes under the provisions of the *Bureau* of *Indian Standards Act*, 2016 and the Rules and Regulations framed thereunder, and the products may be marked with the Standard Mark.

7 SAMPLING

Representative samples of the material for ascertaining conformity to the requirements of this standard shall be drawn as per requirements of testing protocols.

8 TESTS

8.1 All the tests shall be carried out as specified in *col* 3 of Table 1 and *col* 4 of Table 2.

8.2 Quality of Reagents

Unless specified otherwise, pure chemicals shall be employed in tests and distilled water (see IS 1070) shall be used where the use of water as reagent is intended.

NOTE — 'Pure chemicals' shall mean chemicals that do not contain impurities which affect the test results.

Bureau of Indian Standards

BIS is a statutory institution established under the *Bureau of Indian Standards Act*, 2016 to promote harmonious development of the activities of standardization, marking and quality certification of goods and attending to connected matters in the country.

Copyright

BIS has the copyright of all its publications. No part of these publications may be reproduced in any form without the prior permission in writing of BIS. This does not preclude the free use, in the course of implementing the standard, of necessary details, such as symbols and sizes, type or grade designations. Enquiries relating to copyright be addressed to the Director (Publications), BIS.

Review of Indian Standards

Amendments are issued to standards as the need arises on the basis of comments. Standards are also reviewed periodically; a standard along with amendments is reaffirmed when such review indicates that no changes are needed; if the review indicates that changes are needed, it is taken up for revision. Users of Indian Standards should ascertain that they are in possession of the latest amendments or edition by referring to the latest issue of 'BIS Catalogue' and 'Standards: Monthly Additions'.

This Indian Standard has been developed from Doc No.: FAD 16 (18094).
